BRICKS AND BLOCKS JUNIOR ENGINEERS

“Bricks and Blocks Junior Engineers” before and after school workshops use LEGO® Education SPIKE™ kits and iPads to deliver a fun and engaging robotics program for students in years 1-6. The workshops are a great way to expand the student’s interest and build their confidence along with skills that are important to their future success. These sessions are run by an experienced primary school teacher who has over fifteen years in the profession. We build, we code, we play! Class numbers are limited to ensure that individual student’s needs are catered for and each student is supplied with their own kit and iPad to work with.

Workshops will run for eight weeks each term. Click the link below to find out more information on session times, prices and to secure your spot. Workshop student numbers are limited so get in early and don’t miss out!
